

## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features. A **patented flushing system** that clears sand and debris from the unit, and is **salt-water proof.** A **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The **RT2/RT4 Series** features **27 Kg (60#) break-strength**, either Stainless Steel nylon coated cable or Spectra/Nylon line and a high impact housing. The **RT3 Series** features **36 Kg (80#) break strength**, Spectra/Nylon line, and a high-impact housing. Both are available in multiple retraction forces and mounting options for any gear you need to keep handy and can't afford to lose.

**Retractable Side Arm Tethers** provide a **low-profile lanyard** to prevent snagging while allowing full mobility. Additionally the defined **break-away point** provides safety should entanglement occur and the exclusive Q/C Connector system provides easy disconnection of firearm. Avoid the constant entanglement and hassels of coil-type lanyards.

**New 360° Rotating MOLLE Mount** provides a secure and compact mount to the MOLLE system that also allows the Gear Keeper to rotate during use minimizing resistance and line fatigue.

**New Integrated Gear Holster** provides the benefits of a holster with the security/ease of use of a retractable tether.

**Grab your gear, use it, let it go — it retracts back every time!**

Gear Keeper makes whatever you're doing easier while preventing loss or damage to your valuable gear.
