## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The RT3 series features 36 Kg (80#) break-strength with Nylon/Kevlar line. The RT2 series and the **New RT4 series** features 27 Kg (60#) break-strength with stainless steel nylon coated cable. The **New RT5 Micro Series** features 18 Kg (40#) break-strength with a spectra/nylon line. All four series Gear Keepers have high-impact housings and are available in multiple spring forces and mounting options for securing the gear you need to keep handy and can't afford to lose.

The **High Force Locking Net Retractor** has revolutionized the holding, securing, and use of a landing net. It's perfect combination of force and extension allows full landing net use without restriction. Use your net, then let it go; it stores itself on your back. No more worrying about losing your net or fumbling to re-attach a magnet. And the handy **Locking Mechanism** secures your net while hiking through brush.

The **Wading Staff Tether** is the best way to secure a wading staff at your side so it's accessible but isn't getting tangled around your legs. Use your wading staff, then let it go; it'll be right there when you need it. The **New RT4 Series Wading Staff Tether** makes a great product even better! It offers longer extension for cross-body reach and now comes as a **Combo Mount**—both a **Snap Clip** and **Threaded Stud** in the same package! That's even more flexibility for mounting your Gear Keeper right where you want it.

The **New RT5 Micro series** Gear Keeper is the perfect **Zinger** solution — small/light package, strong 18 Kg (40#) break-strength, long 91 cm (36") extension, 70 gr (2.5 oz.) retraction force that handles both your nippers and forceps.

Additionally it includes all of the standard Gear Keeper features; patented flushing system, saltwater proof, and Q/C end type.
